Kane County Health Department Offers Bivalent COVID-19 Vaccine Boosters

The Kane County Health Department (KCHD) will be offering the bivalent Moderna and bivalent Pfizer vaccines at Kane Vax Hub on Saturday September 17, 2022.

Check for appointment availability at [KaneVax.org](https://www.kanevax.org). Individuals requiring assistance with appointments can call the Kane Vax line at 855-4-KANEVAX (855-452-6382).

The Kane Vax Hub is located at 501 N. Randall Road in Batavia, Illinois.

The bivalent booster shot targets two versions of the coronavirus: the original strain, and the Omicron subvariants BA.4 and BA.5. The previous booster shot targeted only the original version of the virus.

The bivalent booster is now available to people 12 years and older, given at least two months after receiving a primary vaccination series or last booster.

The updated Moderna bivalent booster is authorized for people 18 years and older while the Pfizer bivalent booster is authorized for people 12 years and older.

These updated bivalent boosters will replace the original formulation (monovalent) booster in the 12 and older population. Children aged 5 to 11 will continue to receive the original formulation (monovalent) booster. Children under age 5 are not eligible for a booster

People who are moderately to severely immunocompromised should consult with their specialty provider about timing and dosage of vaccines.

For additional information and current updates about COVID-19, visit the KCHD website at [KaneHealth.com](https://www.kanehealth.com) or call the health department at 630-208-3801 and select the COVID line.
